

Acetaminophen Dosing Guide

Acetaminophen is a medicine that treats fever and pain. Other names for acetaminophen are Tylenol, Tempra, and FEVERALL. **Do not give acetaminophen to babies under 2 months of age.** Dosing should always be based on the weight of the child. To measure liquids, always use a medicine cup or dropper.

Repeat dosing every 4-6 hours.

Weight	Infant's and Children's liquid 160mg/5mL	Children's chewable 80 mg tablet
6 to 11 lbs	1.8 mL	-
